Revsoft has teamed up with Sapphire UK (The worlds leading reseller of INFOR FMS Sunsystems) to deliver infor FMS SunSystems services and support within Cyprus and surrounding regions.

Revsoft helps its clients to enhance their business potential by providing new and improved leverage technologies in the area of information systems.

Charter Invoicing from REVSOFT.

Chartering is an activity within the shipping industry. In some cases a voyage charterer may own cargo and employ a shipbroker to find a ship to deliver the cargo for a certain price, called freight rate. Freight rates may be on a per ton of cargo basis over a certain route.
Time and Vessel chartering is a complex business. Making the right decisions at the right time is the key to success in this field of operation.

Revsoft's Charter module can work standalone or seemingly integrate with your existing system. This system allows the user to either import RECAPP and technical information from a pre-defined document or enter the details manually. This information is required in order to prepare the hire invoice. (This information can be modified if the user has the correct access level assigned.

Once the Recapp and technical data have been created in the charter database, a series of calculations take place based on periods, stevedore, Tonnage, Bunker levels, Broker commissions etc…

Streamline interactions between chartering operations and accounting. Several departments within the organization stand to benefit from such an implementation.
Technical department will be able to store all damage reports along with their respective documents in a standard database and recall at a touch of a button. Automatic generation of recap will be simplified. Validated data will be transferred to the financial department thus bypassing manual input, countless emails and minimizing human error.

Features:

➢ WEB Enabled
➢ Charter agreement details
➢ Recapp
➢ Stevadore damages (1 invoice per damage)
➢ Disbursements expenses incurred such as CEV/fuel/claims
➢ Voyage charter agreement details
